

Matías Oveja Smith

SOFTWARE ENGINEER

🌐 t.me/mati_os | ✉️ matias.ovejasmith@gmail.com | 🏠 x.com/mati_os_eth | 📱 MatiasOS | 📺 mOvejaSmith | 📧 @mati-os

Summary

Software Engineer with 10+ years of experience building web applications, APIs, and distributed systems with TypeScript, Node.js, and React. Proven tech lead who has managed cross-functional teams of up to 6 engineers, coordinated with multiple external stakeholders, and shipped products in fintech, blockchain, and identity verticals. Deep expertise in Web3 (Ethereum, Solidity, smart contracts) and modern AI engineering tooling. Active speaker and mentor in the developer community.

Skills

Languages TypeScript, JavaScript

Backend Node.js, Express.js, NestJS, REST APIs, GraphQL

Frontend React, Next.js

Databases PostgreSQL, MongoDB, Redis

Web3 Ethereum, EVM, Solidity, IPFS, Swarm, Libp2p, Smart Wallets, HD Wallets (BIP39), L2s

DevOps & Infra Docker, GitHub Actions, Vercel, Digital Ocean, AWS, Azure, CI/CD pipelines

AI Engineering LangChain, RAG, Agents, Prompt Engineering, Python

Experience

OpenScan

Remote, Argentina

SOFTWARE ENGINEER

Nov. 2025 – Present

- Building a multi-chain blockchain explorer supporting multiple EVM and non-EVM networks
- Developing frontend interfaces with React and integrating with chain-specific RPCs
- Setting up CI/CD pipelines with GitHub Actions for automated testing and deployments

AI toque QR

Remote, Tandil, Argentina

ENGINEER LEAD

Sep. 2024 – Mar. 2025

- Built and led a 5-person cross-functional team (4 developers + UX researcher)
- Conducted user interviews to validate product direction and align the team with real-world needs
- Led weekly syncs with stakeholders and planned sprints accordingly
- Established QA processes and CI/CD pipelines on Digital Ocean and Vercel
- Contributed hands-on to backend (Express.js, PostgreSQL) and frontend (React, Next.js)

Brink Trade

Remote, USA

DEVELOPER

Mar. 2022 – May 2024

- Designed and shipped the public REST API with Express.js and TypeScript, adopted by external integrators
- Supported external teams in integrating with Brink's public APIs and SDKs
- Modeled database schema and built PostgreSQL client for protocol v2
- Implemented React UI to track cross-chain transaction status in real time
- Contributed to indexers, solver/filler services, and SDK powering cross-chain DeFi transactions
- Mentored at Devcon Bogotá's Infinite Hackathon

Proyecto DIDI

Remote, Argentina

CONSULTANT → TECH LEAD

Apr. 2020 – Jul. 2022

- Joined as external consultant; promoted to Tech Lead within 9 months based on technical and leadership impact
- Led a team of 6 engineers and coordinated delivery across 5 external partner teams
- Designed system architecture and QA pipelines across 5+ microservices for a decentralized identity platform
- Led code reviews, managed third-party integrations, and performed end-to-end QA across the full stack
- Held regular meetings with non-technical stakeholders and drove documentation standards for partner organizations

Windingtree

Remote

DEVELOPER

Dec. 2017 – Feb. 2020

- Built travel API integrating Sabre and Air France booking systems (XML to JSON transformation layer)
- Built APIs to access smart contracts, IPFS, and on-chain data
- Developed ETHBerlin 2018 booking app with React, Express, MongoDB, and HD Wallets
- Contributed to JavaScript SDK and mentored at Hack Travel hackathon

Early days

Tandil / Buenos Aires, Argentina

JAVASCRIPT DEVELOPER

2015 – 2019

- Built microservices with Seneca.js, REST APIs with Express.js, and caching layers with Redis
- Built POC and MVP products for a medical startup (GraphQL, PostgreSQL, AWS) and a social network project (Express.js, MongoDB)
- Developed tools and integrations using SAP ABAP, JavaScript, and Node.js

Education

UNICEN (Universidad Nacional del Centro de la Provincia de Buenos Aires)

Tandil, Argentina

PROFESSIONAL CERTIFICATE IN ARTIFICIAL INTELLIGENCE

2026 - Present

- University-level program covering Machine Learning, NLP, Deep Learning, Computer Vision, and LLM-based applications.

UNICEN (Universidad Nacional del Centro de la Provincia de Buenos Aires)

Tandil, Argentina

SYSTEM ENGINEERING

2008 - 2025

- Coursework: Software Engineering, Data Science, Agile Development, Project Evaluation
- Capstone: Route optimization system for municipal waste collection in Rivadavia, Buenos Aires

Talks, Workshops & Hackathons

Nodo Serrano

Tandil, Argentina

ORGANIZER & SPEAKER

Oct. 2025 - Present

- Organized and delivered talks on Blockchain fundamentals, Ethereum smart contracts, and AI engineering

Infinite Hackathon

Bogota, Colombia

MENTOR

Oct. 2022

- Mentored teams building intent-related dApps using Ethereum and decentralized protocols
- Provided guidance on Brink smart contract integration and API usage
- Gathered developer feedback to improve Brink's developer experience

Identihack

Remote, Latin America

SPEAKER

Jul. 2021 - Aug. 2021

- Delivered a technical talk introducing Self-Sovereign Identity (SSI)
- Presented Proyecto DIDI's architecture and challenges in decentralized identity

Beereal

Tandil, Argentina

TEACHER

Mar. 2020 - Apr. 2020

- Taught workshops on Ethereum smart contract development with Solidity
- Introduced core blockchain concepts to developers with no prior experience

Tandil Dev Meetup

Tandil, Argentina

ORGANIZER & SPEAKER

2019

- Organized local tech meetups and delivered talks on Solidity, smart contracts, and React/Node.js
- Led a hands-on Solidity workshop for developers

WindingTree Hackathon

Prague, Czech Republic

MENTOR

Oct. 2018

- Mentored teams building travel-tech dApps using Ethereum and decentralized protocols
- Provided guidance on API integration, smart contracts and design decisions

Technical Writings

Medium Blog

medium.com/@mati-os

TECHNICAL WRITER

2019 - Present

- Articles on blockchain patterns, Web3 development, and software engineering topics

JavaScript Guide Series

Xoor

TECHNICAL WRITER

2019

- Published a 4-part JavaScript guide series covering ES6 features, the **this** keyword, destructuring, and async patterns (callbacks to async/await)
